## Participants Needed for Autism Research

Stanford University researchers are currently recruiting children with and without autism (i.e. typically developing) to help study the efficacy of a novel software-hardware application used on Google Glass that will help aid behavioral therapy.

To be eligible for this study your child must be:

- Between ages 6-17 years old
- Have a diagnosis of Autism Spectrum Disorder (ASD) **OR**
- Be in good medical health and without a severe neuropsychiatric disorder
- **AND** be willing and able to complete cognitive assessments and computer testing at Stanford University. (average 1-2 visits)

\*\*Your child will be\_paid up to \$25.00 for his or her participation

\*\*There is no cost to participate in this research study.
